MADE IN CHINA

Supporting our customers

High stock levels

£300m of inventory readily available

Next day delivery

We use a national carrier network to maintain continuity of service

Order online 24/7

We are here when you need us, with up-to-date inventory levels

Product Plus sourcing

Whatever you need however obscure – we can get it

RS Local

We offer a contactless click & collect service, plus custom order services for kitting and consolidated delivery

Best in class eCommerce experience

Our RS PurchasingManager® web order management tool & eProcurement solutions can help streamline ordering processes

Protecting our people

People First

Home working wherever possible. In the workplace - managed cells, social distancing, enhanced PPE requirements

Product Support

At RS we are ready and prepared to support your business.
By your side.

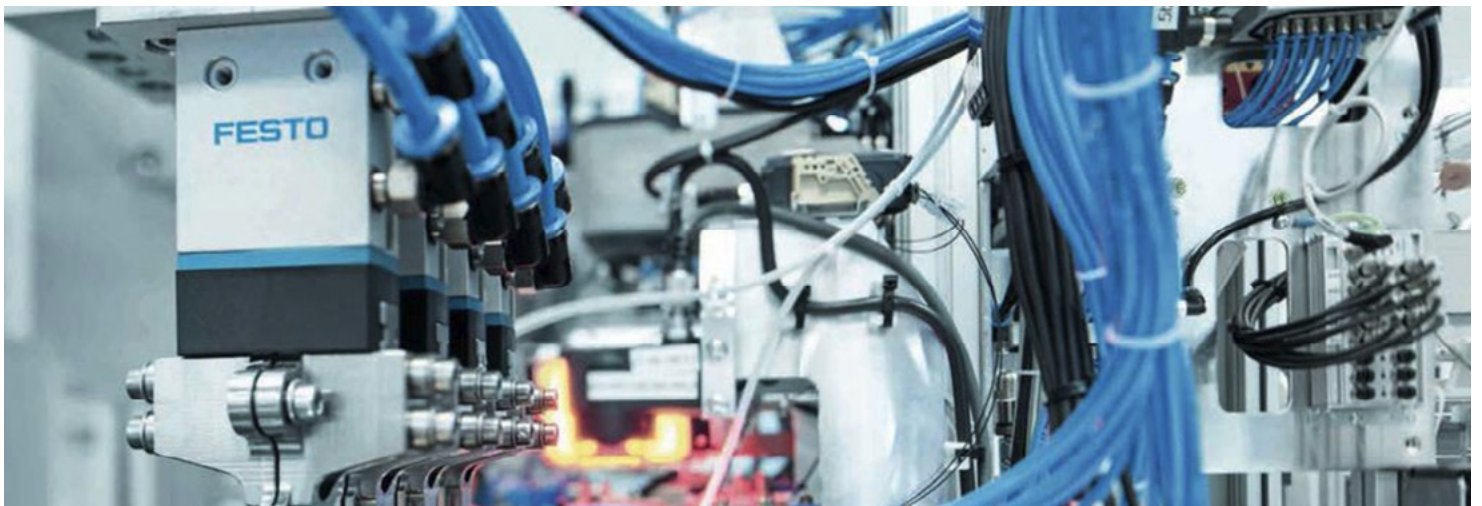

Mechanical power transmission

Packaging machinery has many moving and rotating parts conveying product, applying labels, bending & sealing all requiring bearings, couplings, belts and linear motion components.

Pneumatics

Primary used for pick and place positioning as well and bending folding and sealing for packaged products - needing cylinders, actuators, valves, tubing, and air preparation equipment.

Lubricants & greases

With lots of moving parts inside packaging machinery and potential 24/7 operation, lubrication and cleaning are vital for continually trouble free operation.

Sensing

From photoelectric and capacitive sensors to detect boxes and plastics; limit switches and position sensors as well as vision sensors and barcode scanner to ensure packaging is complete and correctly marked.

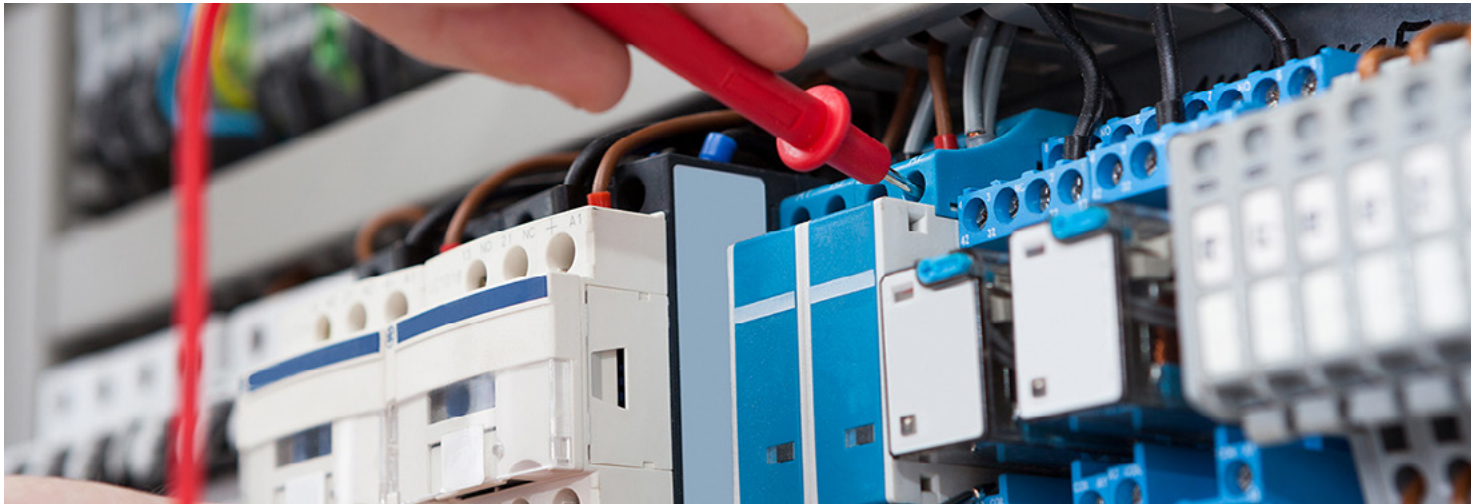

Health & Safety

To protect operators and manage the risk of cuts and abrasions. There is both a legal and productivity requirement for use of both Machinery Safety & Personal Protective Equipment (PPE) in the packaging sector.

Electrical & automation

Motors, motor control and drives, logic controllers, PLCs and relays are all core automation elements of a packaging process combined with power supplies, electrical cable & connectors.

Tools

Whether the business is producing packaging for an end user, building packaging machinery or using automated packaging machines within their production line tools are a crucial component of ongoing maintenance.
